## Ball-Fence Handrail System

Our galvanised steel safety barriers are designed to comply with AS 1657:2018 by separating pedestrians from forklifts to prevent serious injuries or worse.

Ball-Fence is a modular guardrail system that includes stanchions, a top handrail and a centre knee-rail.

Design flexibility is a strength of the Ball-Fence, using galvanised post and rail components that can be configured to suit any requirement or length. Industrial swing gates, guardrails and asset protection options are also available to enhance the safety features of the range.

Usually the Ball-Fence components are assembled on site, but can be partially assembled in our factory and delivered in sections for simple installation.

**Stanchions are supplied with fixings.**
