

# STEEL PALLET CAGES

## SPCT-02SP SPECIFICATIONS

Type SPCT-02SP Steel Pallet Cage is designed for safe storage and transport of loose or packaged goods. The side panels are mounted to a 1160 x 1160 mm steel pallet (included) making it suitable for long-term outdoor use, harsh conditions, heavy loads and is easy to sterilise when used in clean room environments.

This cage can be transported by forklift or pallet trolley, can be stacked up to 4 high when empty and 2 high when loaded. The base is designed with racking locators making it suitable for storage on pallet racks.

The front top and rear frames are designed to swing outwards for easy access to goods within the cage, even when stacked. The complete front and rear frames can be removed.

Optional galvanised sheet metal flooring (SPCT-F) is available upon request. The optional SPCT-F fits over existing slat base to prevent objects from falling through.

Supplied standard as flatpack, for onsite assembly complete with steel pallet. Zinc Finish

Front drop-down gate

Rear hinge gate

Removable back gate

Removable front & back gate
