

WHEELIE BIN TIPPER MWBT-M-GATE SPECIFICATIONS

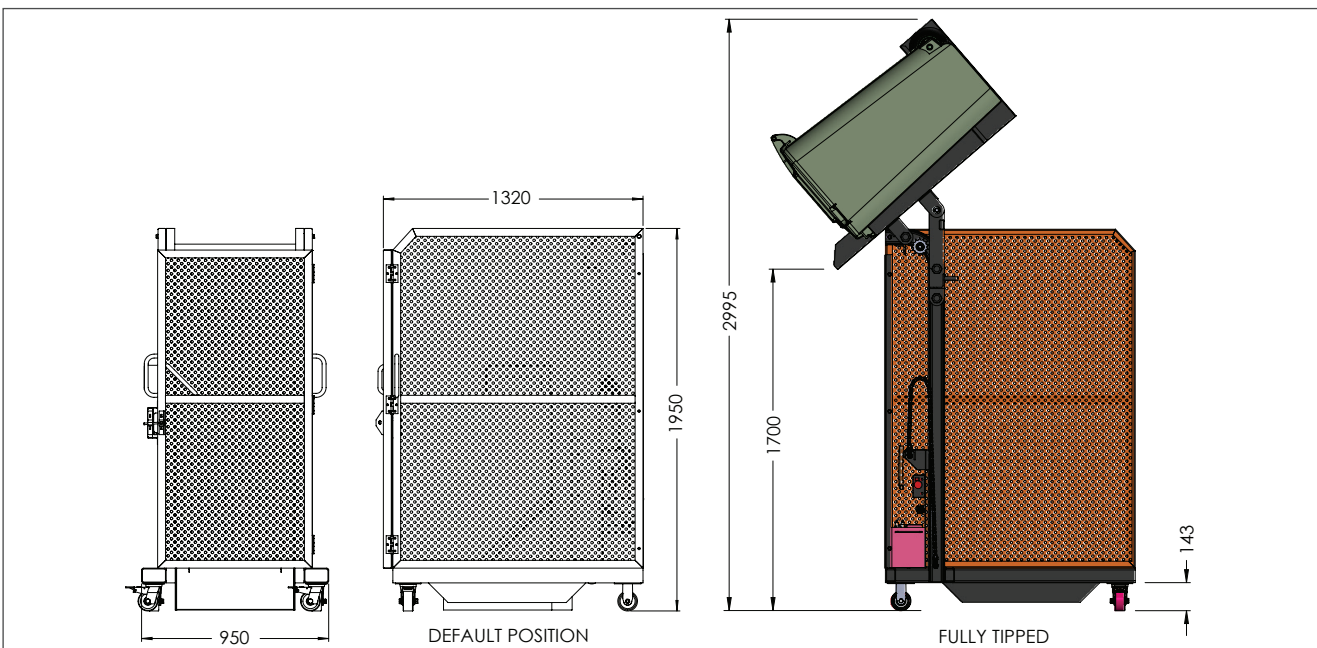

MWBT-M-GATE Wheelie Bin Tipper is designed to safely lift and empty wheelie bin waste into a larger collection bin. Ideal in commercial and industrial settings where a large number of bins are emptied, this unit improves worker safety and makes waste collection and disposal more efficient and convenient.

Features:

- Suits 80L, 120L, 140L and 240L wheelie bins
- Powerful electric/hydraulic tipping mechanism
- Interlocking safety gate stops tipping cycle if gate opened
- Safety two hand push button operation
- Toe guards protects operator during use
- Weather & dust proof control panel with key switch
- Quality multistage battery charger with battery level indicator
- Fitted with battery isolator switch
- Castors with brakes allow mobility around the work place
- Reduces the risk of workplace injuries associated with manually lifting of heavy bins
- Enamel paint finish

Working Load Limit (WLL)	500kg
Suits Bin Types	80L / 120L / 140L / 240L
Overall Dimensions	1270 x 950 x 1930(h) mm
Full Cycle Time	21 SECS (rest, tip & return)
Tip Height	1700mm
Power supply	12V/75AH battery + charger
Unit Weight	350kg

NOTE: Refer to bin manufacturer's specifications for the rated capacity of the wheelie bin. Do not exceed wheelie bin capacity without the manufacturers approval. The typical capacity for a 240L bin is approx. 100kg.
